Name: _____

SCIENCE	
PHYSICAL PROCESSES	**P6**

- Identify 3 familiar appliances that use electricity and need to be plugged in ……
- Identify at least 2 sources of light, *e.g. torch, candle, classroom light* ……
- Identify at least 2 sound sources *e.g. tape recorder, ruler on a table* ……
- Identify a sound source when object out of view from 3 objects in front of them ……

Performance Description – P6 Pupils recognize distinctive features of objects, ***e.g. the features of living things in their environment, and know where they belong, for example, feathers on a bird, leaves on a tree.*** They begin to make generalizations, connections and predictions from regular experience, ***e.g. expecting that ice cream will melt, or making wheeled objects move faster by pushing on a smooth surface or releasing them down a slope.*** Pupils sort materials according to single criterion when the contrast is obvious. They closely observe the changes that occur, ***e.g. when materials are heated, cooled or mixed.*** Pupils identify some appliances that use electricity. They show they know some sources of sound and light, ***e.g. remembering their location.***
