Name : _____

SCIENCE	
MATERIALS AND THEIR PROPERTIES	**2A**

- Name familiar materials *e.g. wood, plastic, metal, fabrics, clay & identify some of their properties* ……
- Sort materials according to simple properties e.g. shininess, hardness, smoothness by choosing own criteria ……
- Predict ways in which materials can be changed *e.g. by heating, cooling, bending, stretching* ……..

Level Description – 2A Pupils identify a range of common materials & know about some of their properties. They describe similarities & differences between materials. They sort materials into groups & describe the basis for their groupings in everyday terms *e.g. shininess, hardness, smoothness*. They describe ways in which some materials are changed by heating or cooling or by processes such as bending or stretching
