Name : _____

SCIENCE	
MATERIALS AND THEIR PROPERTIES	**2B**

- Name familiar materials *e.g. wood, plastic, metal, fabrics, clay, & will support discuss their properties* ……
- Sort materials according to simple properties using closed questions to identify a given criteria……
- From observations pupils can describe ways in which materials were changed …….

Level Description – 2B **Pupils begin to identify a range of common materials & know about some of their properties. They describe similarities & differences between materials. They sort materials into groups & describe the basis for their groupings in everyday terms *e.g. shininess, hardness, smoothness*. They describe ways in which some materials are changed by heating or cooling or by processes such as bending or stretching**
